

working on a fresh future

zümex[®]

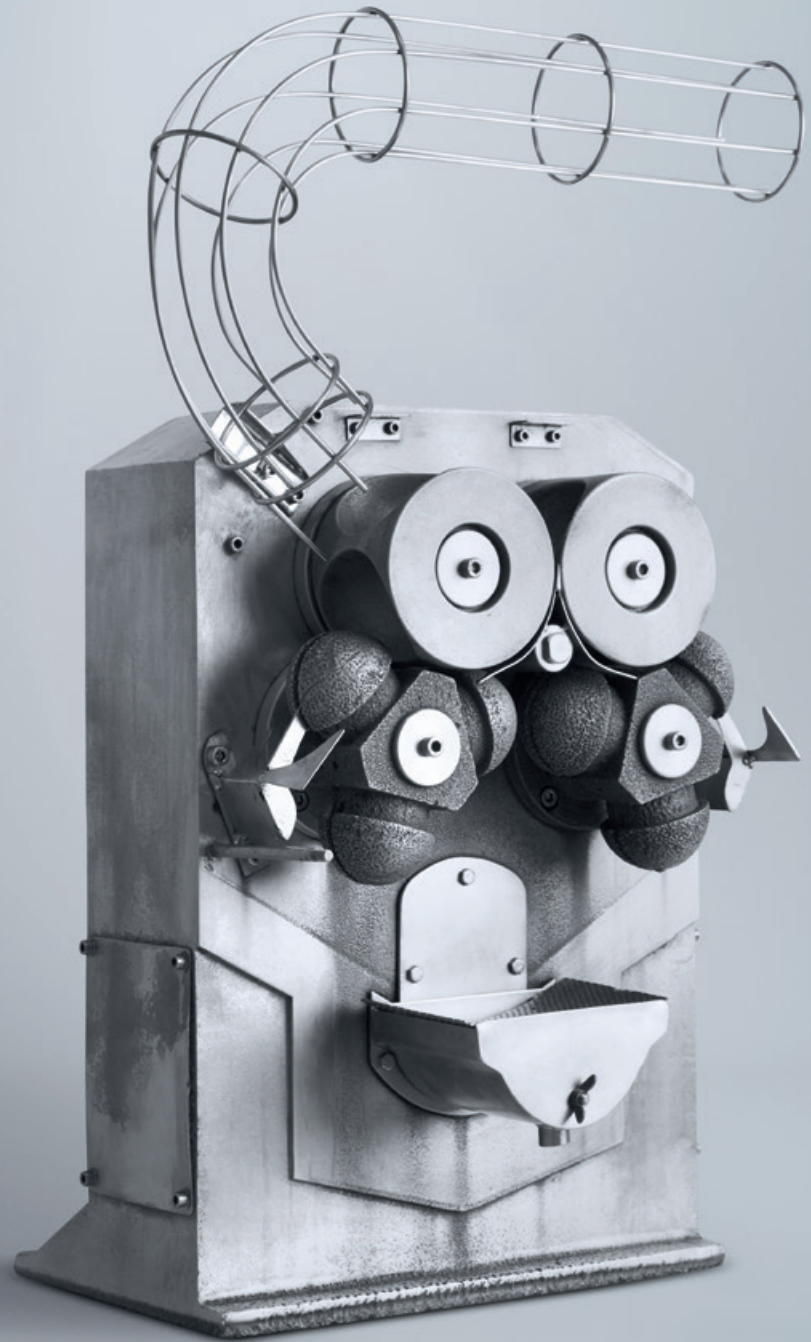

z&mex

When we created the category more than 35 years ago, we were so certain that the concept of on-the-spot squeezed juice would be a success that we designed commercial juicers with the intention of making them last for as long as possible.

Some of these machines are still a working proof of our commitment to excellence.

Working
on a
fresh
future.

Your business,

is our business.

We grow, we improve, we learn

20 million pieces of fruit squeezed every day

Data is an essential part of our business, as it helps us to make the necessary decisions and continue to improve. In other words, thanks to data we have been able to get to where we are now, enjoying a strong presence in five continents and five subsidiaries. In small local companies and large international groups such as Nike, Google or Facebook. With solutions ranging from the world's most compact super-automatic commercial juicer to a premium juice production plant in New York. Our juicers serve juices by land, sea and air, 24 hours a day, 365 days a year. Around 5 million

juices every day. More than 200,000 an hour, 3,472 per minute or more than 58 every second. We cannot understand our business without data. That is why we launched the Soul Series 2, the first ever commercial juicer with connectivity, along with the rest of the Smart Juicer range and Zumex Connect, to provide our partners with their own data and the information they need to improve their business performance and increase their profits — in real time and from anywhere.

20M/day

140M/week

560M/month

Top performance

Extracts more juice for each **fruta** squeezed

There are certainly many ways to evolve. But to stay ahead you can never compromise on product quality. We are sure of that. We are committed to making sure that every innovation has a positive impact on our current and future partners. That is how we broke into the hospitality industry with the Original System® more than 35 years ago.

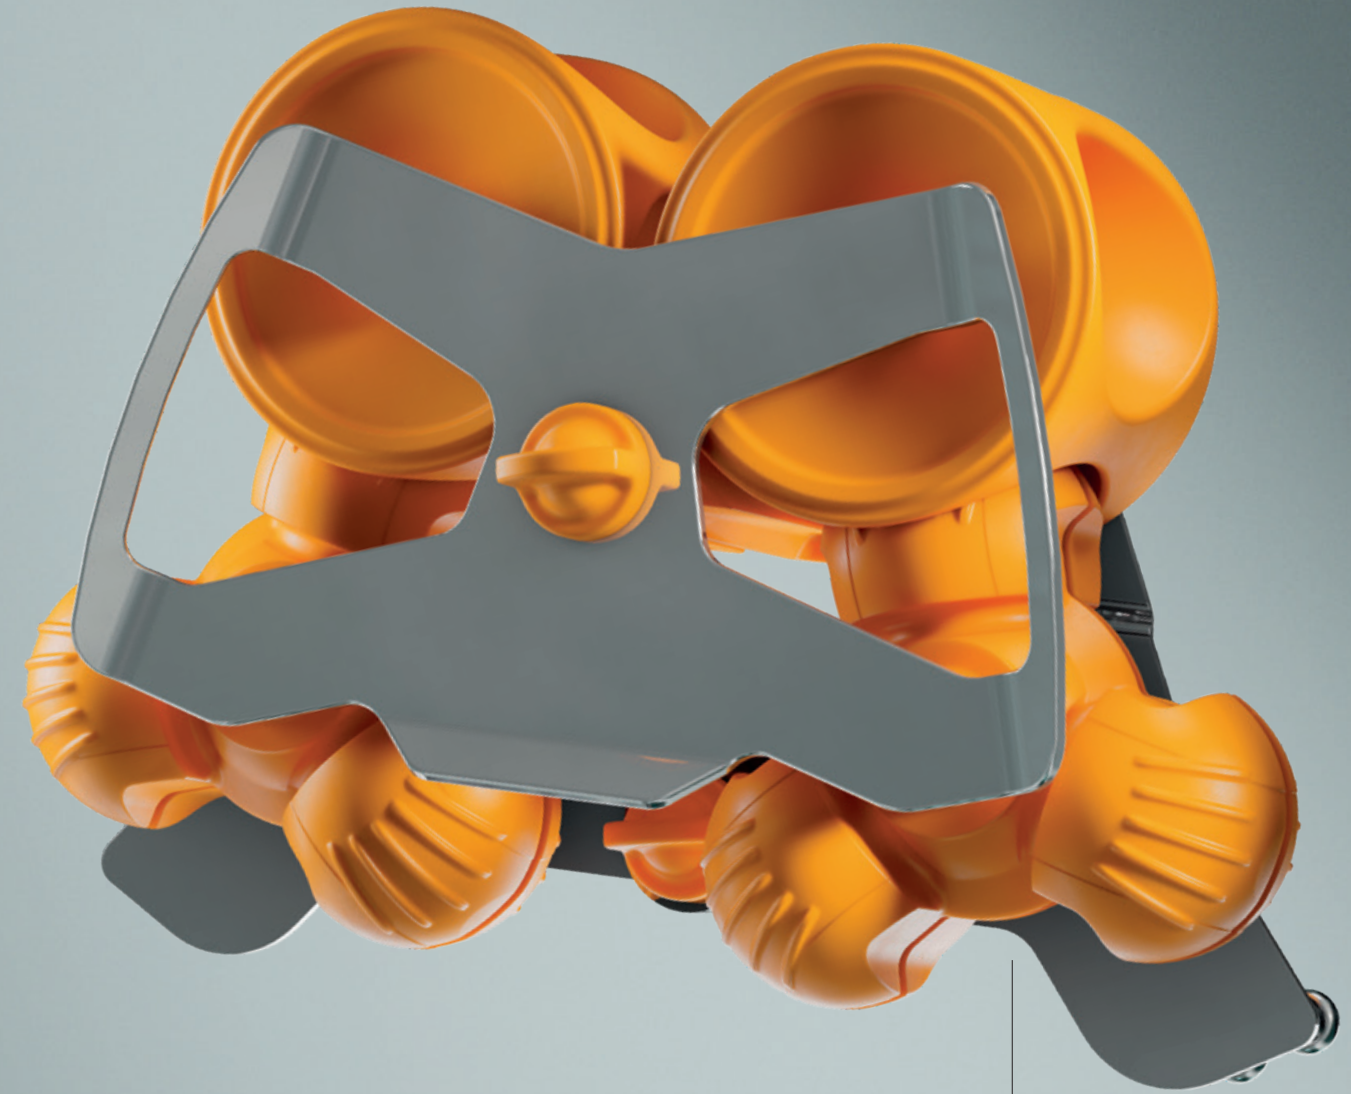

A juicing unit that made the most of every fruit, to which we added silver ion nanotechnology to ensure food safety — the ASP®.

And yes, we are talking in the past tense. Why? Because we have reinvented it. Welcome to the new Original System® Top Performance. It perfectly adapts to every orange, exerting the optimum pressure on every piece of fruit. More yield, more profit. Up to 10% in savings on the cost of the fruit. Squeeze ten, and another one for free. These are the changes that pay off.

ASP® Antibacterial nanotechnology with silver ions.

Innovation without limits

Patented

Take control with the new 1Step Kit

When we say that we work hand in hand with our partners, it is not just a figure of speech. The new 1Step is the best example of this philosophy. Our clients needed to simplify the cleaning process and reduce cleaning times. Said, done and ready to go. After six years of constant innovation, we have now launched the third generation of accessories with a sturdier structure. It is also more ergonomic and easier to dismantle, hold and transport thanks to its

new handles, even with just one hand. That is why this accessory, which makes maintenance and cleaning of Zumex juicers quicker and easier, is now even quicker. And with an iconic design that, in addition to making it unique, complies with NSF certification and its strict quality, safety and hygiene standards. Ready to take control?

Maximum durability

Marine grade stainless steel

Just a tap. But what a tap. If you are wondering how to make such a 'simple' component last as long as possible, the answer is easy: with the tireless efforts of our engineering team. Since the first generation of the Speed tap, more than 10 years ago, we have pursued absolute simplicity. We have achieved this with the third generation of taps. We used over-injection technology to combine two materials in one piece; we added an activation sensor,

an anti-drip system with no service limit and a ring for locking the tap in continuous service mode; and we implemented a frosted finish to make disassembly child's play. In addition, the housing is made of marine-grade stainless steel, able to withstand the effects of juice acid and the most aggressive cleaning processes. And all that, in just two components. But what components.

Highly resistant — meets the highest hygiene standards. **AISI 316**

Smart juicers

Discover the Zumex range of solutions with connectivity and Smart Juicing technology.

The new generation of Smart commercial juicers offer you a Big Data and remote management service for your juice business.

Access all the information on the use, status and productivity of your commercial juicers in real time from any location via the Zumex Connect service. With different types of reports: basic, advanced and maintenance.

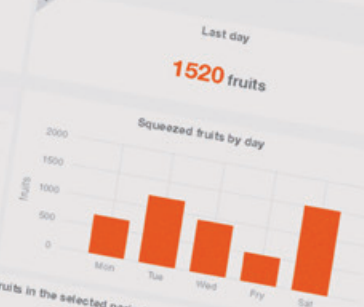

01 Improve the Juice Corner's results.

02 Maximise your return on investment.

03 Manage your juice business remotely.

Juicing solutions

Find the commercial juicer that best suits the needs of your business

Multifruit

Pure power, unlimited creativity.

Specifications			
Fruit type	Fruits and vegetables	Type of consumption	High
Diameter of fruit	Up to 75 mm	Waste capacity	13 l
Rate (rpm)	(1) 3,500 (2) 4,500	Measurements Width Depth Height	290 x 500 x 510 mm
Glass and/or jar	Up to 210 mm		
Voltage	220-240 V 50-60 Hz	115 V 60 Hz	
Power output	870 W 1.17 HP	870 W 1.17 HP	

Zumex's commercial juicer's name was not chosen randomly. Multifruit is always ready to juice any fruit or vegetable in its way – from apples to pineapples, celery and carrots, thanks to its titanium shredding disc.

And always means always. 24-hour non-stop service. Its Brushless motor is 4 times superior to conventional motors. No friction. No heat release. No change in the taste of the juice. Its Speed Control System keeps a constant speed by modifying the power when necessary, with a speed selector that adapts to each type of fruit and vegetable.

And, although it may not seem possible, it consumes less energy than any other commercial juicer on the market.

And that's not all: it also features Easy Grip, an anti-drip tap that has better grip and is more hygienic; a safety system that stops the disc in case of any intervention; and a robust design, with materials and finishes that have been carefully selected down to the last detail, available in five colours. Beautiful, isn't it?

Oh, and it has the largest waste container on the market (13 l). If that's not enough, just add the Countertop Kit accessory for infinite autonomy — it never stops.

Features: Colours: Models: Acc. and more info:

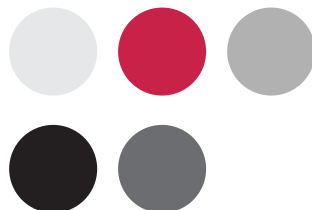

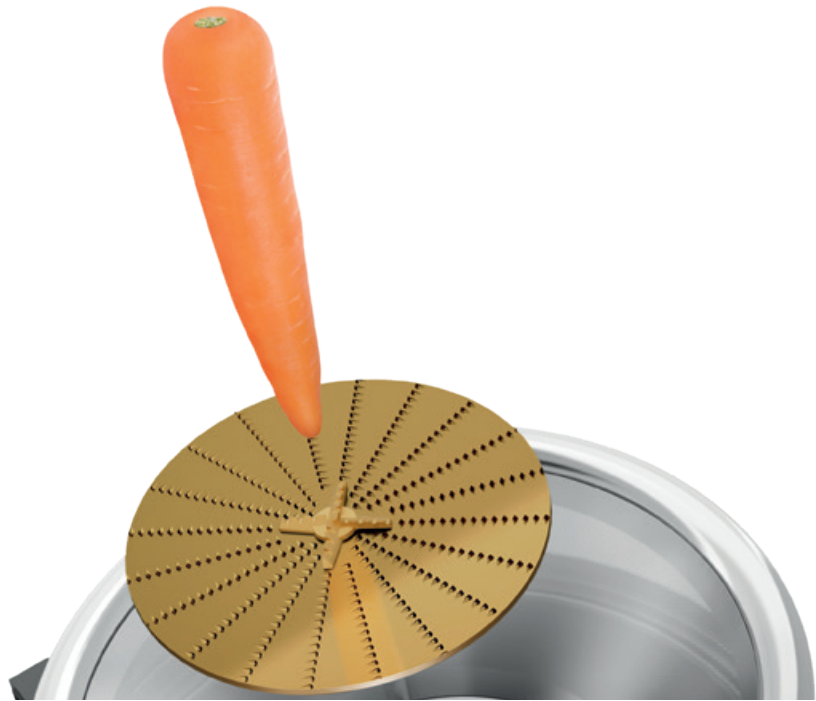

Table-top

Titanium Shredding disc

Maximum strength for all fruits and vegetables and long-lasting sharpness.

Optimal flow anti-drip tap

Better grip and more hygienic.

Soul Series 2

Design and intelligence in the smallest space.

Specifications

Fruit type	Oranges, tangerines, limes, lemons*	Type of consumption	Medium
Diameter of fruit	M Kit (Std) 64-81 mm S Kit (Opt) 45-65 mm XS Kit (Limes Ed) 42-52 mm	Feeder capacity	3/6 oranges, 7/8 limes
Fruits per minute	[M/S]: 18 fruits / min [XS]: 36 fruits / min	Waste capacity	4 l
Speed	1 juice in 10"	Measurements Width Depth Height	300 x 480 x 537 mm
Glass and/or jar	Up to 115 mm		
Voltage	Multi Voltage 100-240 V 50-60 Hz		
Power output	100 W 0.134 HP		

*It is recommended to use lemons from varieties with rounded shape and thin skin, for example: Eureka, Lisbon, Meyer.

Zumex's entire experience and R&D have been merged in a single commercial juicer with smaller footprint, heart, brain and soul. Soul Series 2 makes absolutely no compromises.

Smart Juicing technology helps you monitor in real time the performance and productivity of all your juicers, configure them, manage them remotely and know when they need maintenance.

Conical System® is not only a juicing system reduced to a minimum. It has also been designed to be twice as fast. Through our ASP® nanotechnology with silver ions, in addition to sounding super scientific, maximum food safety is achieved.

Juice any citrus fruit from 42 to 81 mm and create different preparations: juices, cocktails, mocktails, pastries, dressings, sauces...

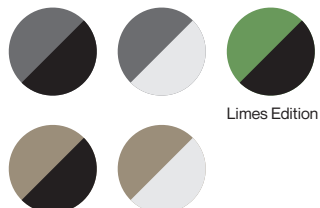

Add to all that the 1Step Case Out, which makes cleaning very easy, and the PulpOut System, which automatically extracts the pulp and seeds. Press the button and get your juice within 10 seconds. It's not magic. We call it Push&Juice.

Minex

The hard part will be choosing the colour.

Specifications			
Fruit type	Oranges	Type of consumption	Moderate
Diameter of fruit	65–78 mm	Feeder capacity	6 / 7 fruits
Fruits per minute	13 fruits / min	Waste capacity	4.5 l
Speed	1 juice in 15"	Measurements Width Depth Height	383 x 368 x 712 mm
Built-in glass and/or jar	Up to 120 mm		
Voltage	Multi Voltage 220–240 V 50–60 Hz	100–115 V 50–60 Hz	
Power output	44 W 0.06 HP	44 W 0.06 HP	

The Minex commercial juicer has been designed to be present in a wide variety of establishments, such as cafes or bakeries. The only thing you have to think about is which of its 12 colours best fits your business.

Its compact juicing system is an adaptation of our Original System® — for smaller spaces, but as reliable as ever, and featuring ASP® antibacterial nanotechnology for maximum hygiene and protection. Choose how to use it: with the built-in jar to serve it yourself or with

the self-service, non-drip tap for your customers to get their juice themselves. Either way, juice will be ready in 15 seconds and waste will go directly into its built-in container. Convenient, fast and clean.

750 ml jar capacity.

Push-button system — a juice in 15"

Essential Pro

Maximum simplicity.

Specifications			
Fruit type	Oranges, lemons, limes, tangerines	Type of consumption	Medium
Diameter of fruit	65-81 mm (45-67 mm with S Kit)	Feeder capacity	4/5 fruits
Fruits per minute	22 fruits / min	Waste capacity	10 l (2 x 5 l)
Speed	1 juice in 10"	Measurements Width Depth Height	470 x 500 x 750 mm
Glass and/or jar	Up to 165 mm		
Voltage	220-240 V 50-60 Hz	115 V 60 Hz	
Power output	300 W 0.40 HP	320 W 0.43 HP	

Essential Pro maintains the essence of the range: simplicity, performance and hygiene, taken to the extreme. Yes, you can also juice by simply pressing a button – directly into a glass, a bottle or a jar –, but you can also put it in Autostart mode and you won't even have to press it. It will start juicing as you feed the citrus fruits into the feeder.

The anti-drip tap has two operating modes: one for self-service use and one with an optional locking mechanism for continuous use.

So you can use the option that best suits you at any given moment, and it also helps to keep everything cleaner.

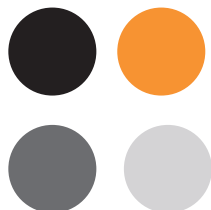

Hygiene is also guaranteed thanks to the new Top Performance juicing unit. Besides obtaining more yield from each fruit, it uses silver ion nanotechnology, ASP®, to inhibit bacterial growth.

Features:

Essential Basic

Just push a button.

Specifications

Fruit type	Oranges, lemons, limes, tangerines	Type of consumption	Medium
Diameter of fruit	65-81 mm (45-67 mm with S Kit)	Feeder capacity	6 / 7 fruits
Fruits per minute	22 fruits / min	Waste capacity	10 l (2 x 5 l)
Speed	1 juice in 10"	Measurements Width Depth Height	470 x 500 x 880 mm
Glass and/or jar	Up to 165 mm		
Voltage	220-240 V 50-60 Hz	115 V 60 Hz	
Power output	300 W 0.40 HP	320 W 0.43 HP	

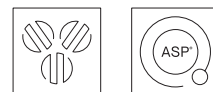

Essential is that one thing you can't do without. That's why we made the Essential combine 3 things we believe are necessary in every one of our juicers: ease of use, performance and hygiene.

Just a single button. Press to juice. Press to stop. That's it — freshly-squeezed juice. When we say easy, we mean very easy, but

without sacrificing functionality. You choose whether to use the anti-drip tap to pour the juice directly into the glass or jar.

We have added our most advanced juicing unit, the Top Performance, and with ASP® nanotechnology that inhibits bacterial growth.

Versatile Pro

The most compact super automatic juicer.

Specifications			
Fruit type	Oranges, lemons, limes, tangerines	Type of consumption	High
Diameter of fruit	65-81 mm (45-67 mm with S Kit)	Feeder capacity	16 kg 35 lbs
Fruits per minute	22 fruits / min	Waste capacity	10 l (2 x 5 l) All-in-One 52 l
Speed	1 juice in 10"	Bottle holders	38 mm / 36 mm / 34.4 mm
Glass and/or bottle	Up to 120 mm All-in-One 255 mm	Measurements Width Depth Height	480 x 550 x 890 mm All-in-One 480 x 550 x 1695 mm
Voltage	220-240 V 50-60 Hz	115 V 60 Hz	
Power output	380 W 0.51 HP	320 W 0.43 HP	

Versatile Pro, complete and very easy to use. Its feeder capacity (16 kg), with a front door that facilitates the loading of fruit, provides maximum autonomy in a very small space. It includes the new PulpOut system to juice more fruit without interruptions. Up to 150 kg.

Thanks to the 1Step M Kit, it is possible to remove the juicing unit, featuring ASP® antibacterial technology, in a single step. Also dishwasher safe. Hygiene and convenience hand in hand. And with the S Kit you could also offer lime and lemon juices to your customers.

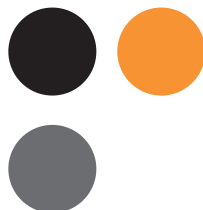

Switch between its two operating modes – self-service and professional – and set the number of fruits per juice from its digital display.

Two models to choose from depending on your needs. The table-top model for cafes and catering chains. The All-in-One model, with podium included and capacity for 52 litres of waste, for self-service spaces in hotels, filling stations, supermarkets or greengrocers.

Versatile Basic

Naturally automatic.

Specifications			
Fruit type	Oranges, lemons, limes, tangerines	Type of consumption	High
Diameter of fruit	65-81 mm (45-67 mm with S Kit)	Feeder capacity	10 kg 22 lb
Fruits per minute	22 fruits / min	Waste capacity	10 l (2 x 5 l)
Speed	1 juice in 10"	Measurements Width Depth Height	480 x 550 x 855 mm
Glass and/or jar	Up to 165 mm		
Voltage	220-240 V 50-60 Hz	115 V 60 Hz	
Power output	380 W 0.51 HP	320 W 0.43 HP	

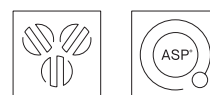

Versalite Basic follows Zumex's philosophy on ease of use. A single button controls both the start and end of juicing. But it's even a little more convenient.

Thanks to its built-in feeding system, with capacity for 10 kg of fruit, it can produce about 20 juices before needing more fruit. Make better use of the time between one load of fruit and the next while serving the best freshly-squeezed juice without distractions.

No distractions and no bacteria. The new Top Performance juicing unit, featuring ASP® antibacterial nanotechnology, has been improved to squeeze more juice out of each piece of fruit. Hygiene and total performance.

The anti-drip tap makes it possible to pour the juice directly into the glass or jar. And no matter what, its built-in waste container collects fruit residues so your business is always spotless.

Power output	380 W 0.51 HP		320 W 0.43 HP

So automatic that customers can do it all by themselves: pay, pour the juice and enjoy it.

Payment by card, whatever type it is, so that no one is left without their juice. Nayax payment system with 4 types of payment options: magnetic stripe, chip, MIFARE or contactless. And for those who prefer to leave their cards at home and pay only with their phones, Apple Pay, Samsung Pay, Google Pay... are also available.

If you are worried about someone not knowing how to use it, don't worry. Versatile Pro will explain the 3 steps to follow, and assist the user in the process — so that no one gets lost in the process.

It will also let you know when the juicer needs to be cleaned and the waste emptied. It is that smart, it detects if the cover or juice container is opened, it counts the oranges so you can program how many it juices in each service, it has a password for the operator... and allows modules to extract even more usage data.

Perfect for offering freshly-squeezed juice in self-service areas, offices or coworking spaces.

We've fine-tuned Speed Up to make it even better, now featuring our new Top Performance juicing unit. It delivers the best performance on the market while looking as stunning as ever at your point of sale.

The new Up tap is just as easy to use as it is to clean. Its blocking function makes filling large bottles more convenient. **Su función de bloqueo en máquina sobremesa hace más cómodo el llenado de jarras.**

The new automatic PulpOut system, lighter and easier to transport, eliminates unpleasantly long fibres, avoiding blockages and

improving autonomy.

Two operating modes: Self-service, where you just press the tap and fill the bottle, and Professional, where you choose exactly the fruit to be squeezed.

Its All terrain wheeled podium is available in Wide or Slim, with Black or Mirror finish.

New cleaner and more protected look thanks to the Dark cover, the new Inox peel outlets and the digital display cover.

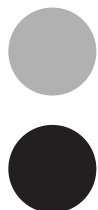

The fastest, but also very easy to use.

Zumex's flagship is the best choice for supermarkets, hotels, restaurants and businesses with high demand for freshly-squeezed juice. The undisputed leader in performance.

Featuring the new NSF-certified 1Step Kit to make cleaning the machine almost as easy as pouring juice. A more ergonomic one-piece design for extracting the unit. It has the best self-service tap on the market, sturdier, with fewer parts and easier to disassemble and clean. With locking function for continuous operation and an improved anti-drip system.

Automatic PulpOut system, with triple filtration and conveyor belt that transports the soluble fibre and eliminates unpleasantly long fibres. It is also much lighter and easier to handle during removal for cleaning.

New cleaner and more protected look thanks to the Dark cover, the new Inox peel outlets and the digital display cover.

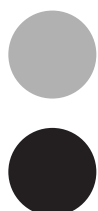

If you are sure about this option, all you have to do is choose between the Countertop, All-in-One and Tank versions, with a storage tank for juice. Don't look for something better, because it doesn't exist.

Voltage	230 V / 50 Hz	230 V / 60 Hz	115 V / 60 Hz
Power output	325 W 0.44 HP	420 W 0.56 HP	280 W 0.38 HP

Introducing the first high-performance commercial juicer designed to juice any type of pomegranate, making it extremely easy to do something not that easy. Pomegranate juice in a matter of seconds.

One of the first challenges we encountered was the blade itself, as it had to be able to cut the toughest husks, hence the choice of titanium; we designed the juicing system to perform at its best with the new fruit; we re-designed the PulpOut system to be equally effective with seeds and to eject them faster; and we made non-stop production of up to 100 kg of pomegranates possible without any intervention at all.

At 30 pieces of fruit per minute, the name Speed is almost an understatement... but its Up tap easily and flawlessly tackles that amount of fruit. Easy to use and very practical thanks to its ergonomic design and bottle holder. Not to mention the high-quality materials and all the details a Speed always features.

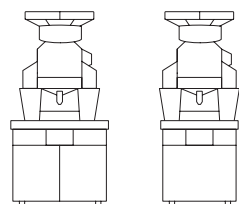

Features:

Its strength guarantees excellent cutting and durability.

PineOmatic

Peel and cut natural pineapples without a fuss.

Specifications

Fruit type	Pineapple	Type of consumption	High
Speed	30"/pineapple	Pineapple display capacity	8 units
Size	7 or 8 (Choose machine settings according to the desired size)	Waste capacity	40 pineapples
Container size	Size 7: 110 mm - Ø 115 mm Size 8: 110 mm - Ø 95 mm	Display	Video Display 15" (Opt)
Voltage	220-240V 50/60Hz	Measurements Width Depth Height	540 x 950 x 1,500 mm
Power output	200 W		

It's as easy as choosing the pineapple of your choice, placing it in the PineOmatic and picking up the container. In the meantime, you can watch the whole process, almost hypnotically, through the window. Fruit prepared, cleaned and ready to eat in a matter of seconds. Let the machine do the hard work and let your customers focus on enjoying a 100% natural, freshly cut pineapple. Making the most of the edible part of each pineapple and reducing waste.

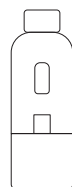

A screen explains the process along the way, multiplying the sale of pineapples by up to 5 times. Moreover, there is a separate screen inside for the operator, providing access to the user manual as well as clear assembly and disassembly instructions.

What about maintenance? You only need 15 minutes a day for cleaning, and all spare parts are dishwasher safe, to simplify it even further.

Press power	0.75 kW (1 hp)	Voltage	Single-phase 220-240 V 50 - 60 Hz

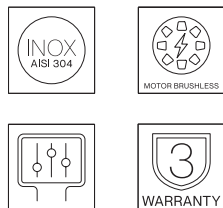

The Zumex cold-pressing solution for making all kinds of fruit and vegetable juices. Mastery makes the difference thanks to its crushing efficiency and power, featuring grating discs and a Brushless motor.

Unrivalled power and efficiency to crush any fruit or vegetable without sacrificing the properties of fresh fruit. The 11 tonnes of power in the stainless steel press is combined with plates designed for the highest performance, up to 110 litres per hour. Sounds good, tastes better. With Mastery, you can fully customise your range of juices and provide a totally exclusive and natural product. It has been designed to make your job easier, with a full-colour

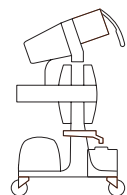

touch screen to control all parameters. Use the four preset programmes or create your own programmes for creative freedom.

Hygiene and safety are not overlooked either, with sensors to stop the machine if necessary and an emergency push-button to stop the machine immediately.

Features:

Models:
