

STEELHEART®

INTRODUCING THE NEWEST ADDITIONS TO THE STEELHEART® FAMILY

SIDEMOUNT REFRIGERATOR UNDERCOUNTERS AND WORKTOPS

The new space saving design places the condenser on the side of the unit creating a front breathing air flow which means more space inside and out for your operation to flow.

- More space inside and out
 - More usable interior space, (fits full size pans in top and bottom shelves and drawers)
 - Requires a back wall clearance of just 1" and is shallower compared to rear mount units giving your operation more room to move
- Hoshizaki's signature air flow movement circulates cold air top to bottom to surround food with uniform cool temperatures
- Insulated with 2" CFC free, foamed in place polyurethane for superior cooling, temperature maintenance and ultimately reduced energy usage
- Easy-to-reach front venting with removable filter to keep things clean
- Electronic controller with audible and visual alarms and LED display
- Energy efficient hot gas condensate removal is standard
- Stainless steel exterior and interior for superior durability

Available in 46", 60", 67", and 93" models

As anyone who runs a commercial kitchen knows, only the strong survive. Just like our legendary ice makers, we've designed our new Steelheart Series to survive conditions that would send lesser equipment to the scrap yard. **Hoshizaki. Beyond Strong.**
